

Caberdek Overview

Caberdek is an innovative answer to the demands of the construction industry as it meets two important needs, safety and weather protection. Caberdek incorporates a waterproof, slip-resistant film adhered to moisture resistant Caberfloor P5.

As well as providing extra protection against the elements, Caberdek provides a safe working platform. When correctly installed, Caberdek assists with 'Falls Protection' required within latest regulations.

The protective film has high impact, puncture and tear resistance which stands up to intensive on-site traffic. On completion of construction the Caberdek film can be easily removed; leaving a clean floor surface for the new property owner, saving clean-up costs for the builder.

Benefits

- Safe working platform – slip-resistant film and assists with fall protection
- Withstands high site traffic – impact, puncture and tear resistant film
- Film is easily removed – saves clean up costs and time
- All systems are fully BBA approved – can be exposed to the elements for 42 days
- 44db sound reduction when used in conjunction with leading I-beam and insulation manufacturers

Installing Caberdek

To ensure compliance with the BBA certificate, Caberdek must be installed using the Caberfix fixing products. Our recommended installation method involves the Caberfix Pro system which can be purchased either as a kit (2 kits to a pack of Caberdek) or as individual components.

The Caberfix systems provide a fully weather tight installation and when using Joint&Joist adhesive a silent floor.

For more information the range of Caberfix products see pages 13–15.
